# QUICK REFERENCE **PARTS HAND BOOK**

**10<sup>th</sup> EDITION / 2021 SEASON**

KEY GENUINE AND AFTERMARKET PARTS FOR  
**GREGOIRE & VINESTAR/URM GRAPE HARVESTERS**

[WWW.GREGOIRE.COM.AU](http://WWW.GREGOIRE.COM.AU) | 03 8353 3657 | **PFG**AUSTRALIA

**LOOKING  FOR A DEAL?**  
**TALK TO YOUR DEALER *today!***

## **Welcome to the latest edition of our handbook for Gregoire, Vinestar and URM harvesters.**

This handbook is a great quick reference guide for identifying fast moving and common items for your harvester. From the new GX and GL series machines, the popular G9 Gregoire, all the way back to the 800 series URM/Vinestar machines, you will be able to quickly and easily identify the parts you need.

PFG Australia are the sole Australian distributor for Genuine Gregoire parts, and with more Gregoire machines operating in the country than ever before, our range of parts continues to expand. We offer both genuine Gregoire and high quality aftermarket parts via our Australian dealer network so speak to the experts now!

Call your local Gregoire dealer today and grab yourself a great deal. As always, discounts are available for large orders. We thank you for your continued support through these unprecedented times, and look forward to working with you in the upcoming season.

Thanks & Regards

**ZAC SEIPOLT**

## GENUINE GREGOIRE PICKING RODS

*Exceptionally smooth operation and careful handling of vegetation*

Australian sourced aftermarket rods

After 12' 08" :  
Adaptable blue rod broke

**GREGOIRE PICKING RODS** are made from an exclusive material which guarantees great reliability and reduced wear. They are moulded to prevent deformation, and their tapered form provides improved resistance to impacts and vibrations. Tests carried out under the supervision of a bailiff demonstrate a **service life 2 to 3 times longer** than non-genuine rods.

## **Original GREGOIRE conveyor belts**

### **The only choice for Quality and Reliability**

- Unique colour and logo indicate GREGOIRE quality.
- Weaved with exclusive fibres and reinforced top and bottom layers.
- Every profile is controlled in terms of hardness, dimension and tear resistance.
- GREGOIRE conveyor belts last longer, reducing maintenance costs of your GREGOIRE harvester.
- Keep maintenance costs low by choosing original GREGOIRE spare parts.

## PART OF YOUR TEAM, PART OF YOUR SUCCESS

Wine production is all about developing quality grapes and treating them correctly. Without a thorough understanding of the industry in all its phases, the end product will suffer. Gregoire product development is drawn from 30 years of experience in the viticulture industry in varying climates and regions all over the world. This has helped Gregoire to become one of the world's leading suppliers of grape harvesting equipment.

Today, the brand represents the widest range on the market, with as many as 20 different models which can fulfil requirements in any vineyard. Machines can also be customised to meet particular challenges. More than 400 harvesters are sold each year in more than 20 countries around the world.

Gregoire harvesters are well-known and respected for their functionality, reliability, high quality engineering and driving comfort. Quality systems make these machines extremely reliable, enabling the user to get the very best from the machine, the vineyard, and the grape.

### HISTORY

The Gregoire Company was founded by Edmund Gregoire in 1972 as a family company manufacturing machinery for small acreage farms. Their innovations in 1978 included a tractor towed harvester and later a self propelled grape harvester. The new harvesters were welcomed worldwide as time savers, money savers and dependable machines.

In 1988, Gregoire designed the ARC Picking Head, which revolutionised grape harvesting. By the following year, Gregoire harvesters were so well regarded that sales reached a record level of 270 units. Continued development and refining means that today Gregoire grape harvesters are still regarded as being at the forefront of harvester design.

Gregoire self-propelled harvesters are true multi-function machines, with attachments such as barrel pre-pruners, green trimmers, slashers, mulchers and sprayers used in combination with the harvester body.

### AUSTRALIA

PFG Australia took on the distribution of Gregoire grape harvesters in 2008, which also incorporated UR Vinestar harvesters, previously owned by the Kverneland Group.

In 2015, PFG Australia moved the Mildura-based Viticulture division to a new purpose-built facility in Melbourne. The Melbourne distribution centre includes a three-acre undercover warehouse with state of the art spare parts, service and training facilities.

PFG Australia is a subsidiary of Power Farming Wholesale Ltd, a fully independent and privately owned New Zealand headquartered company with a three-generation history of service to the New Zealand and Australian tractor and machinery markets.

Gregoire offers a range of harvester models, including tow-behind and self-propelled, throughout Australia and New Zealand. The products are sold and serviced via extensive and well-supported dealer networks in both countries.

## INNOVATION THAT SETS THE STANDARD GREGOIRE SELF PROPELLED SERIES

Since launching its first self-propelled harvester in 1984 Gregoire has revolutionised mechanical harvesting of grapes.

With over 30 years' experience and over 300 self-propelled units sold in Australia, Gregoire has continually listened to growers and have updated their technology to improve the harvesting of grapes. Gregoire today produces the GL7, GL8 and GX9 series of grape harvesters to suit every type of vineyard.

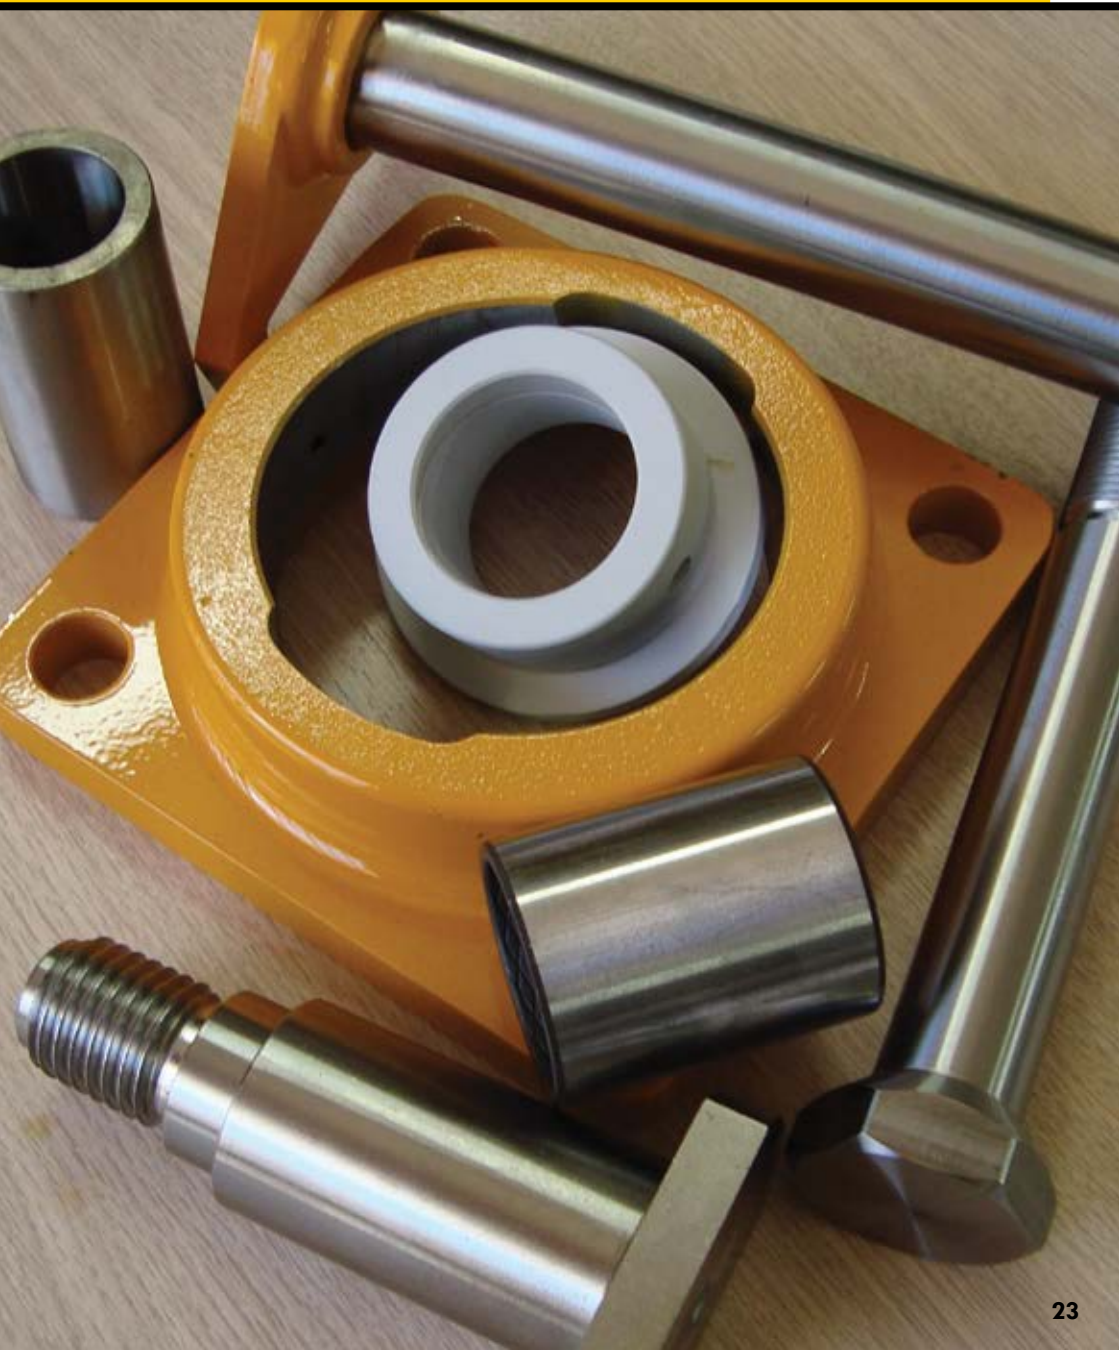

### MAIN FEATURES

- **DEUTZ:** Fuel efficient engine – No Ad blue
- **ECOdrive:** Automatic rpm decrease when turning on headlands
- **AUTOdrive:** On road mode, engine speed and transmission pump are efficiently managed to optimise fuel consumption and noise level
- **AUTOspeed, cruise control:** Constant work speed whatever the vineyard/grove conditions
- **4 wheel drive:** Standard with automatic twin lock (anti spinning)
- **Central cabin:** Ergonomic and comfortable
- **Easy to use joystick:** Controls all functions
- **AUTOlevel:** Semi-automatic slope correction. Total security, simple and fast control
- **VARIwidth+:** Parallel shift of the picking posts. The shakers always keep the same shape which offers you the best picking result
- **Double pendulum system:** Both conveyors and picking head are pendular for a perfect alignment on the row and a softer pick
- **Conveying:** Efficiency and respect of the grape with easy to use belt drive system
- **Maximum cleaning:** Minimal losses with fan and cane extractor system

Range of machines available with discharge arm, twin bin, central bin and Cleantech Vario technology.

**GRAMMER Air Suspension Seat**  
Part No. DF-0.900.0842.8/20

- Air suspension travel 100mm
- Seat belt/holdable armrests
- Fabric cover
- Semi-automatic weight adjustment
- Integrated seat back extension
- Optional headrest part number DF-0.900.0843.3
- Optional safety switch part number DF-0.900.1623.2

**GRAMMER Mechanical Suspension Seat**  
Part No. DF-0.900.0842.8/20

- Seat belt/holdable armrests
- Seat cushion width 400mm
- Adjustable split back angle
- Height and weight adjustment
- Fabric cover
- Optional headrest part number DF-0.900.0843.3
- Optional safety switch part number DF-0.900.1623.2

**GRAMMER Air Suspension Seat with Swivel Base + Safety Seat Switch**  
Part No. DF-0.900.0843.1/20

- Swivel base (20°)
- Air suspension travel 100mm
- Fabric cover
- Safety seat switch
- Semi-automatic weight adjustment
- Air assisted height adjustment
- Optional headrest part number DF-0.900.0843.3

# SHELL TELLUS S2 VX

## HIGH PERFORMANCE HYDRAULIC FLUID

### DESIGNER FOR LONGER LIFE

To meet rising demands for productivity, limiting fluid degradation helps increase oil life and reduce downtime. The new Shell Tellus S2 VX achieved up to two times longer oil life than Shell Tellus S2 V and three times longer oil life than the industry minimum, and is formulated for a balanced performance with both long life and good sludge control.

### WIDER TEMPERATURE RANGE

Shell Tellus S2 VX provides stable viscosity over a wide temperature range compared to ISO HM fluids, that can help improve the performance of your machinery.
